Indexed in Current Contents

Subject Index

Acetamide, hydration of ~ 251
Acetylcholine, solvent effect on the conformation of ~ 105
Azaadenine 79
Azapurine 79

Benzylidene aniline, conformational analysis of ~ 307
Bonding energies and bond orders 1

Chemical reaction network 243
Classification of elementary processes 243
Configuration interaction calculations 73
Configuration interaction 63, 129
Correlation effect on ΔE 117

Diatomic molecules, bonding criteria for ~ 173
Diatomic overlap, multipole expansion of ~ 157
Diimide 223
Direct localization 11

Ethylbenzene oxidation 243
Ethylene 39
Exchange perturbation theory 277
Excited state calculations 223
Exponential AOs, optimum minimal basis of ~ 331
Extended Hückel method 237

Geometrical shapes of molecules consisting of H, C, N, O 237

Heteroconjugated molecules 259

Localized orbitals 11
Long range interactions 39

Magnetic circular dichroism spectra 79
Many-body expansion 11
MINDO/2-Forces method 23
Mixed sandwich complexes of Ti, V, and Cr, INDO SCF MO calculations on ~ 313
Multipole expansion 39

Neglect of differential overlap 291
NO_2, NO_2^+, and NO_2^-, SCF and MC-SCF/CI calculations of ~ 183

O^- ion in irradiated alkaline ice 205
Oligomers of LiH, NaH, LiF, NaF 117
Orbital energies 173

Photoisomerization 223
Polyenes, even, band structure of ~ 191
Polyenes, ions of odd ~ 191

Representation matrices of the unitary group 129

Scattering wavefunctions, algebraic approximation of ~ 143
SCF convergence and level-shifting 325
Self-consistent HMO theory 259
Solvent effect on the conformation of acetylcholine 105
Symmetric group 129

Two-center repulsion integrals, NDDO approximation 89

Unsöld approximation 39

Valence bond 165
Variational principle 143

Water 165
Weak intermolecular interactions 277

EUROPE:
Now you can search ISI® data ON-LINE through ESA-SDS

You now can have immediate access via the ESA-SDS computer to 1,300 of the world's most important physics, chemistry and engineering journals—the same journals covered in the *Science Citation Index®*, *CC®/Physical & Chemical Sciences* and *CC/Engineering, Technology & Applied Sciences*.

Whether you're interested in—

- current awareness
- selective dissemination of information
- retrospective searching as far back as 1972

—the ESA-SDS computer will search the ISI data, find the information you want and deliver it *fast*.

All you need for this quick, on-line searching is a teletype or video-display terminal. You dial a number and are linked to the ESA-SDS central computer in Frascati, Italy.

ESA-SDS may be accessed by direct line with Frascati or by dialing through the PTT network to London, Brussels, Paris, Copenhagen, Darmstadt, or Rome. You can also dial via PTT lines to TYMESHARE in Brussels, Paris, Lausanne, London, or The Hague.

Find out more about how ISI data and ESA-SDS can make your literature searches faster, easier and more effective than ever before.

Mail the coupon below. Or contact David Raitt at the Space Documentation Service, ESA-SDS, Via Galilei, 00044 Frascati (Roma), Italy. Tel.: (Rome) 94 22 401; Telex: 61637 ESRINROM. Do it today.

Springer Chemistry 1977

A Book Selection

Springer-Verlag
Berlin
Heidelberg
New York

Advances in Polymer Science

Volume 24: **Molecular Properties**
130 figures. Approx. 30 tables
Approx. 220 pages. 1977
Cloth DM 84,—; US $37.00
ISBN 3-540-08124-0

Anleitungen für die chemische Laboratoriumspraxis

Band 13: K. CAMMAN
Das Arbeiten mit ionenselektiven Elektroden
Eine Einführung
2., überarbeitete und erweiterte Aufl.
64 Abbildungen. Etwa 250 Seiten. 1977
Gebunden DM 76,—; US $33.50
ISBN 3-540-07947-5

Band 14: H. R. ENGELHARDT
Hochdruck-Flüssigkeits-Chromatographie
2., überarbeitete und erweiterte Aufl.
62 Abbildungen, 18 Tabellen
Etwa 270 Seiten. 1977
Gebunden etwa DM 58,—;
etwa US $25.60
ISBN 3-540-08263-8

Handbuch der Analytischen Chemie

Teil 3: **Quantitative Bestimmungs- und Trennungsmethoden**
Band 4a: **Elemente der vierten Hauptgruppe**
J. W. PRICE, R. SMITH
Tin/Zinn
28 figures, 49 tables
Approx. 360 pages. 1977
Cloth approx. DM 120,—;
approx. US $52.80
ISBN 3-540-08234-4

Band 6b: **Elemente der sechsten Nebengruppe**
G. WÜNSCH
Wolfram
Etwa 60 Abbildungen. Etwa 370 Seiten
1977
Gebunden DM 146,—; US $64.30
ISBN 3-540-08191-7

Inorganic Chemistry Concepts

Volume 1: R. REISFELD, C. K. JØRGENSEN
Lasers and Excited States of Rare Earths
9 figures, 26 tables
Approx. 200 pages. 1977
Approx. DM 62,—; approx. US $27.30
ISBN 3-540-08324-3

Volume 2: R. L. CARLIN, A. J. van DUYNEVELDT
Magnetic Properties of Transition Metal Compounds
In preparation

Polymers/Properties and Applications

Volume 1: B. RÅNBY, J. F. RABEK
ESR Spectroscopy in Polymer Research
356 figures, 32 tables
Approx. 450 pages. 1977
Cloth DM 112,—; US $49.30
ISBN 3-540-08151-8

Reactivity and Structure

Volume 3: H. KWART, K. KING
d-Orbital Involvement in the Organo-Chemistry of Silicon, Phosphorus and Sulfur
Approx. 220 pages. 1977
Cloth DM 86,—; US $37.90
ISBN 3-540-07953-X

Structure and Bonding

Volume 33: **New Concepts**
Approx. 200 pages. 1977
Cloth approx. DM 65,—;
approx. US $28.60
ISBN 3-540-08269-7

Topics in Current Chemistry

Volume 69: **Inorganic Biochemistry II**
By K. KUSTIN, G. C. MCLEOD, G. RENGER, W. BURGER-MEISTER, R. WINKLER-OSWATITSCH
85 figures. Approx. 240 pages. 1977
Cloth DM 84,—; US $37.00
ISBN 3-540-08157-7

Volume 70: **Structural Theory of Organic Chemistry**
By N. D. EPIOTIS, W. R. CHERRY, S. SHAIK, R. L. YATES, F. BERNARDI
60 figures. Approx. 260 pages. 1977
Cloth DM 90,—; US $39.60
ISBN 3-540-08099-6

Instructions to Authors

Manuscripts should be *submitted in duplicate*, typed in double-line spacing on one side of the paper only. Form and contents should be carefully checked to exclude the need for corrections in proof. The author should already mark in the manuscript where figures and tables are to be inserted, as he will receive only *one set of proofs* to correct typographical errors. Authors will be charged for corrections in proof involving changes, additions, or deletions to the original manuscript.

The papers should be preceded by an *English summary* of not more than 100 words. Papers not written in English should have an English translation of the title.

Immediately following the summary, a list of *Key words* (not exceeding five items normally) should be supplied for subject indexing.

Literature references should be numbered and listed at the end of the paper. They should be cited as follows: *journal papers* — names and initials of all authors, journal with abbreviations according to the I.U.P.A.C. list (Chemical Abstracts, Vol. 55, 1961), volume and page number, year in parentheses; *books* — names of authors, full title, edition, place, publisher and year. References should be cited in the text by number.

Figures, graphs, tables and structural formulae should be separated from the text and be numbered. Original drawings and graphs should be made in Indian ink with lines of uniform thickness. Authors should keep in mind that drawings will be reduced to a size not exceeding 12 × 19 cm. In general it should be assumed that the same degree of reduction will apply to all figures in the same paper. Inscriptions should allow for any reduction in scale — a capital letter should be about 1.8 mm in height in the final version. Computer print-outs should be black and evenly printed to allow direct reproduction.

Captions, which should be brief, should be typed separately and attached to the manuscript.

Formulae should be typewritten, special attention being given to the placing of indices and exponents to that they are recognizable as such even though there is no difference in size. Formulae should preferably be written in a "linear" form e. g. $\exp(-\varepsilon/kT)$ instead of $e^{\frac{\varepsilon}{kT}}$). It will help the printer if in doubtful cases the position of indices and exponents is marked thus: $b_{\hat{j}}$, $a^{\dot{\Psi}}$.

Underlining for special alphabets and typefaces should be done according to the following code:

violet:	numerals to be distinguished from letters (1, *l*; zero, *O*)		
single underlining:	small letter		
double underlining:	capital letter	red:	Greek
brown:	boldface	blue:	Gothic
yellow:	upright	green:	Script

The following are frequently confused:

$\cup, \mathrm{u}, \bigcup, U$; $\circ, o, O, 0$; $\times, x, X, \varkappa$; $\vee, v, \nu$; $\theta, \Theta, \phi, \varphi, \Phi, \varnothing, \emptyset$; ψ, Ψ; $\varepsilon, \in$;

a', a^1; the symbol *a* and the indefinite article a. Please take care to distinguish them in some way.
